

## CF Series Gold Melting Intermediate Frequency Induction Melting Furnance

### Product Features and advantages

- All functions are microcomputer controlled consistency, high reliability and ease of operation
- Extremely quiet operation
- High efficiency using a solid-state generator
- Stainless steel construction
- Control of the temperature (option) with thermocouple or optical sensor
- Self-diagnostics including fault and mis-operational messages
- Stainless steel construction
- 100% start-up success rate; power factor > 95%
- Much more efficient than gas-fired and coal-fired method
- Energy saving, Environmental protection, Low pollution level
- No special foundations required, Low operating cost, Easy operation
- Just one main board, this decrease the failure rate and this make the machine repair very easy and convenient. (send the main board to us for repair or change a new one are very easy for you)
